WORK EXPERIENCE

Full Stack Developer   Sep 2022 - Present
ropstam.com| Islamabad, Pakistan

- Working as a Full Stack Developer at Ropstam Solutions, utilizing MERN (MongoDB, Express.js, React.js, Node.js) and Laravel technologies to deliver innovative web and mobile applications.
- Collaborated with a skilled team of web and mobile app developers, content creators, and social media experts, successfully tackling challenging tasks and ensuring project success.
- Contributed to the development of robust and scalable solutions, engaging in end-to-end development, from backend logic to frontend interfaces, fostering efficient and dynamic projects.

Software Engineer   Jan 2022 - Aug 2022
axleolio.com | Ontario, Canada (Remote)

- Served as a Full Stack Developer at Axle & Olio, contributing to the development of "ezCommerce," a comprehensive platform unifying multiple eCommerce stores for streamlined management.
- Implemented functionalities to seamlessly manage products, orders, and data from diverse eCommerce platforms, enhancing user efficiency and providing a centralized solution.
- Utilized a range of technologies to ensure the smooth integration of various eCommerce data sources, offering clients a unified and efficient tool for digital store management.

Software Engineer   Jan 2019 - Dec 2021
qisstpay.com| Islamabad, Pakistan

- Joined Qisstpay as a Software Engineer during its transition from a software house to a pioneering Fintech product. Initially engaged in client projects, then actively contributed to the development and enhancement of Qisstpay.
- Played a pivotal role in the evolution of Qisstpay, a Fintech offering Buy Now, Pay Later services. Developed and maintained features for interest-free installments, providing a seamless experience to Debit & Credit Card users.
- Worked in a dynamic environment, adapting to the shift from project-based work to product-focused development. Contributed to creating a platform empowering Gen Z & Millennials in their shopping experience.

PROJECTS

Qisstpay

- Key contributor to Qisstpay Fintech initiative, introducing interest-free Buy Now, Pay Later services for debit and credit card users, catering to Gen Z and Millennials.
- Integrated Qisstpay into retail platforms, optimizing payment processes for security. Established key partnerships with financial institutions.
- Contributed to the design and implementation of the platform, actively participating in targeted marketing efforts that led to increased user acquisition.

Castle Accommodation

- As a backend engineer for Castle Accommodation, a UK semi-government property management project, we developed and maintained robust systems handling resident, property, employee, and customer data.
- Implemented comprehensive features for reporting, training, and streamlined management processes, contributing to the efficient functioning of the property management system.
- Collaborated with cross-functional teams to ensure seamless integration and responsiveness.

BeMyCourier

- Spearheaded backend development for BeMyCourier, a mobile app revolutionizing freight delivery. Managed APIs and systems, ensuring a seamless platform connecting travelers with individuals seeking efficient package delivery to their loved ones.
- Facilitated a user-friendly experience, allowing travelers with available space to pick up listed packages, fostering a reliable and cost-effective solution for timely and personalized deliveries.
- Contributed to the app's success by optimizing backend processes and enhancing connectivity.

EDUCATION

Bachelor of Science – *Computer Science*   Mar 2014 – April 2018
PMAS Arid University (Rawalpindi)

F.Sc – *Pre-Engineering*   May 2011 – August 2013
Federal Science College (Rawalpindi)
